

Bi: occupied and selected-pair spin sectors

Canonical-momentum derivative proxy · pseudo Gram metric · no integer rounding

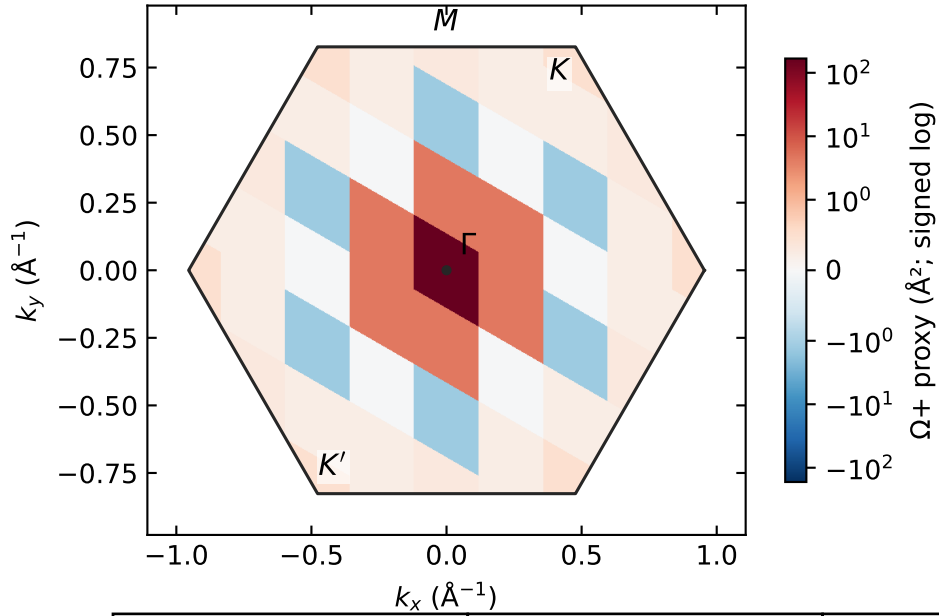

(a) Occupied path bands 1:10

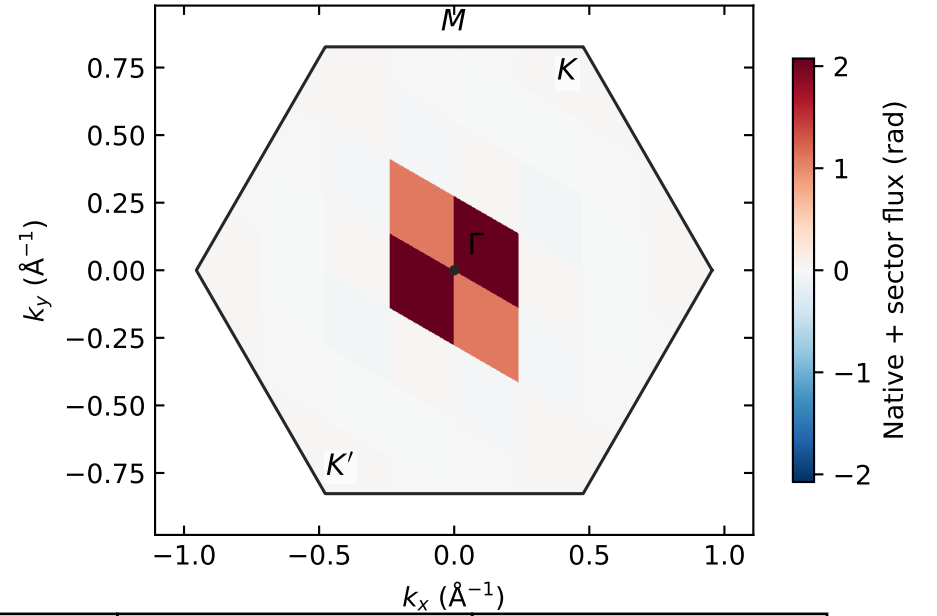

(b) Selected pair path bands 9:10

(c) Occupied full-BZ point samples

(d) Fukui method: occupied flux

Subspace	Raw C_est, +	Raw C_est, -	C+ (Fukui)	C- (Fukui)
occupied 1:10	1.999776	-1.999773	1	-1
pair 9:10	-118.7661	118.7661	2	-2

Lines connect stored points; cell colors are constant. C_est is not a certified topological invariant.
